FOREWORD

THE MEDICAL AND HEALTH RELATED SCIENCES THESAURUS is the list of indexing terms developed and maintained as an integral component of CRISP (Computer Retrieval of Information on Scientific Projects), a comprehensive system furnishing scientific data on all research projects supported by the Public Health Service. CRISP is operated by the Research Documentation Section, Statistics and Analysis Branch, Division of Research Grants. The THESAURUS also comprises the vocabulary base for subject headings appearing in the annual RESEARCH AWARDS INDEX, a product of CRISP also produced by the Section.

Documents used as source material for information entering the THESAURUS, CRISP and the INDEX represent current research projects for FY 1986 covering many widely diversified areas of medicine, dentistry, mental health, and allied public health fields. In order to maintain a vocabulary of terms which is both timely and representative of these changing and expanding research areas, constant revisions are being made. These revisions are reflected in updated editions of the THESAURUS published annually. As in the past, it is hoped that this revised edition will further aid the efforts of NIH information specialist, program management, and other staffs who utilize the resources of the CRISP system.

THESAURUS--------------------- 1

EXPLANATION OF SYMBOLS AND NOTATIONS USED IN THESAURUS

BOLDFACE TYPE	Main terms (approx. 10,000) which constitute the basic vocabulary for subject headings appearing in the annual RESEARCH AWARDS INDEX, HHS Publication No. (NIH) 85-200
SA	(1) "See also related": COMMUNICABLE DISEASE CONTROL SA PEST CONTROL (NONPOLLUTANT) (2) "See also specifics": PROTEINS SA GLOBULINS
XX	Reverse of "SA" -- PEST CONTROL (NONPOLLUTANT) XX COMMUNICABLE DISEASE CONTROL
SEE (Italics)	(1) "See synonymous": HEREDITY SEE GENETICS (2) "See specific": FIBROSIS SEE HEART DISORDERS, CORONARY FIBROSIS
X	Reverse of "SEE" -- GENETICS X HEREDITY
USE (Italics)	Indexing instruction to indicate terms required to cover a particular concept: OSTEITIS DEFORMANS AS AN AUTOIMMUNE DISORDER USE IMMUNOPATHOLOGY, AUTOIMMUNE DISORDERS USE SKELETAL DISORDER, OSTEITIS DEFORMANS
UU	Reverse of "USE" IMMUNOPATHOLOGY, AUTOIMMUNE DISORDERS UU OSTEITIS DEFORMANS AS AN AUTOIMMUNE DISORDER SKELETAL DISORDERS, OSTEITIS DEFORMANS UU OSTEITIS DEFORMANS AS AN AUTOIMMUNE DISORDER
*	Terms followed by an asterisk usually pertain to instruments, other tools, methods or techniques. They are printed in the RESEARCH AWARD INDEX only under special circumstances. RADIOGRAPHY*
NUMBERS	The two four digit numbers to the left of the indexing terms are the computer codes for the alphabetical terms.
